

What does the machine need to know? It is essential to provide these instructions to the machine in the following order.

- Provide list of 10 words
- Choose a random word FROM the list
- Replace each letter from that word with " _ "
- Start the game and show the word with letters replaced (let user send a letter)
- Show Stats → Total attempts
Correct attempts
Incorrect attempts
- If correct answer → -Message: Congrats!
-let user guess the rest
- If incorrect → -Message: Try again!
-Encourage to try again
- Repeat last three steps until done
- If person guess the word → Print:

Congrats!
Try again?

* There will be three main functions:

- 1st: Intro (instructions)
- 2nd: Hangman (Actual game)
- 3rd: Play again

They will be run in that order
